PROFILE SUMMARY

Bachelor of Information and Communication Technology undergraduate at the University of Colombo with a strong interest in Computer Networking and Network Engineering. Hands-on academic and project experience designing and configuring enterprise networks using Cisco Packet Tracer, including VLAN segmentation, trunking, inter-VLAN routing, DHCP, RIP/RIPv2 dynamic routing, IP subnetting, SSH-based device management, and network troubleshooting, along with foundational knowledge of network security concepts. Also familiar with Linux administration and system troubleshooting. **Seeking a Network Engineering Internship** to apply networking knowledge in a professional environment and further develop practical skills in network infrastructure and troubleshooting.

EDUCATION

University of Colombo

2023 - Present

- Bachelor of Information and Communication Technology (Undergraduate)
- Current GPA: 3.621 / 4.00

G.C.E. Advanced Level Examination — Technology Stream

Completed

- Engineering Technology — B
- Information & Communication Technology — A
- Science for Technology — A
- Z-Score: 2.125 Island Rank: 285

TECHNICAL SKILLS

Networking (Core Focus)

Tools & Platforms: Cisco Networking, Cisco Packet Tracer

Concepts: VLANs, VLAN Trunking, Inter-VLAN Routing, DHCP, Routing, RIP, RIP v2, IP Subnetting, Port Security, Network Troubleshooting, SSH, Wi-Fi, Enterprise Network Design

Network Security

Fundamentals: Network Security Fundamentals, Port Security, Application Security, Secure SDLC, Threat Modeling

Systems / Infrastructure

Skills: Linux, Linux Administration, Bash Scripting, SSH, Service Management, Server Troubleshooting

Programming & Databases

Languages / DB: Python, C, JavaScript, MongoDB, MongoDB Atlas

NETWORKING PROJECTS

VIP Hotel Networking System

Cisco Packet Tracer

- Designed and implemented a multi-floor enterprise network for Vic Modern Hotel connecting three floors and eight departments using Cisco Packet Tracer.

- Configured VLAN segmentation and inter-VLAN routing to separate and manage traffic across departments.
- Set up DHCP services and RIP dynamic routing for automated addressing and inter-network connectivity.
- Implemented Wi-Fi access, SSH-based router management, and serial DCE connections between routers.
- Performed network troubleshooting and validated end-to-end connectivity across the enterprise design.

Key Technologies: *Cisco Packet Tracer, VLANs, Inter-VLAN Routing, DHCP, RIP, SSH, Wi-Fi*

Enterprise Multi-Site Network Design

Cisco Packet Tracer

- Designed and configured a multi-site enterprise network connecting Branch, HQ, and Web networks.
- Implemented VLAN segmentation with Router-on-a-Stick inter-VLAN routing and RIP v2 dynamic routing.
- Configured DHCP and DNS services along with trunking and IP subnetting across all sites.
- Tested and troubleshooted connectivity across the network to verify reliable inter-site communication.

Key Technologies: *Cisco Packet Tracer, VLANs, Router-on-a-Stick, RIP v2, DHCP, DNS, Subnetting*

CERTIFICATIONS

- Network Addressing and Basic Network Architecture — Cisco
- Network Management Approaches — Cisco
- Network Security Principles — Cisco
- Overview of Important Protocols — Cisco
- Linux Fundamentals — Red Hat
- Getting Started with Git and GitHub — IBM
- Python for Beginners — University of Moratuwa
- Python Programming — University of Moratuwa
- Web Development — University of Moratuwa

LANGUAGES

- **Sinhala** — Native
- **English** — Working Proficiency

SOFT SKILLS

Problem Solving, Analytical Thinking, Network Troubleshooting, Teamwork & Collaboration, Communication, Time Management, Adaptability & Willingness to Learn, Self-Learning, Attention to Detail, Critical Thinking, Leadership
